#### REAL HEAD OF AMERICAN ARMY.

Under Present System Secretary Of War is Supreme.

SCHEME BRINGS FRICTION.

Orders Are Issued in Name of Lieu tenant General Whether He Approves of Them or Not.

Special Correspondence.

Washington, March 29 .- As long as the present system is maintained we are bound to have friction between the secretary of war and the commanding general of the army, no matter who the men may be who fill these positions. The only time that such friction was absent was during the seven years that Gen. Schofield commanded the army, and the general says this harmony was secured because he "abandoned all pretense of being commanding general and acted as chief of staff under the secretary of war. Of course, during all this time there was perfect peace in the United States. If there had been a war, no one can tell how long the amicable conditions would have lasted. Under the army regulations the only authority exercised by the commanding general over the army is "that which pertains to its discipline and military control. A company of soldiers cannot be moved without an order from the secretary of war. All orders are "Issued three the commanding general," but not "by him. If he does not approve the or ders, they are issued just the same, and in order to comply with the regulations which issue orders "through" there is a line at the bottom of the order which says "by command of Lieutenant General Miles." Orders are sent to the army headquarters and initiated by one of the aids if the commanding general

CHIEF OF STAFF WANTED. Naturally present conditions lead to friction. That is why the present sec-retary of war wants a chief of staff who shall be the commanding general of the army. Now the chief of staff o the man who acts as such is the adjutant general. He is the advisor of the secretary. He prepares and issues the secretary's orders. If he does not agree with the secretary, he issues the order just the same. But naturally his advice is sought, especially when it has been found to be for the best interests of the army. If there should be a chief of staff provided, it would have to be a man who was in accord with the secretary, as in military matters there must be one supreme head. He would have to be a hard worker and a man who was within close call, at the elbow of the secretary, so to speak, all the time. That is where the adjutant general is, and with complete informa-tion on every topic he makes himself absolutely invaluable to the secretary. Secretary Root is a hard worker, but no more so than Geenral Corbin, and for that reason the latter is the chief aid of the present secretary, as he was

of Secretary Alger during the Spanish war. It does not look as if the plan

of a chief of staff would go through this Congress, and it is therefore likely

The big cities are again here making a fight for pneumatic tube mail serv-ice. After a trial Congress put an ead to the system last year, but the pro-moters are back here again working as hard as they can. Complaint is made that Congress discriminates in favor of rural districts in appropriations for the rural free delivery in the country, while the service in the cities is not kept up to the actual necessities But then there are a great many more people interested in rural free delivery than in fast city mails.

Representative Heatwole of Minneso ta is taking the lead in the fight to have all the census clerks who were in office when the permanent census act became a law brought under the classified service branket and made eligible to ap pointment in other branches of the pub lic service. He has reported a bill for this purpose from the census committee, but he is not sure that he will ever get a chance to have it considered, although he will watch the proceedings for an opening. Heatwole is not very much impressed with the civil service regulations and thinks that the govern ment departments would be improved by the infusion of new blood in the way of clerks who were appointed by po litical influence.

MINERS OF KNOWLEDGE.

chairman of the committee on mines and mining. He did not select the committee because of any particular interest he had in the subjects which come before it; it was one of the things that occur in the makeup of committees. At cocur in the makeup of committees. At the same time there are men on the committee because of their own seek-ing, because they or their states are in-terested in mines. These are Clark of Montana and Kearns of Utah, two multimillionaires who know the mining laws as men who have worked under them. Let any subject come up relat-ing to changes in the mining laws and both these men are interested, and they go right to the heart of the subject Stewart of Nevada has been practicing mining all his life, and Dubois and Heitfeld of Idaho, whose state is in a rich mineral section, are interested in mines. Sometimes the law miners and the practical miners disagree, and then there are lively times in Scott's committee.

#### DEBATE CALLED OFF

State University Students Decide No

To Enter Contest With L. D. S. versity and the State University, which was to have been held on April 4, has been called off at the instance of the state university people. This action has roused the indignation of the students of the other institution, who feel that they have not received fair treatment. Arrangements had been made to meet on the date named and discuss the subect of "Government ownership of Rail ways" and the remarkable feature about it is that the challenge was issued by the state university students the assembly hall providing it could be secured, but it was learned that it would be occupied on the date set but So the L. D. S. students wrote their ri vais the situation and proposed that the date be changed accordingly. They received the reply that the debate had been called off because the univesity students who were going to participate had been kept in suspense too long The L. D. S. students say that this rea-son given is a subterfuge, ascribing as

the real cause the securing of the de-

bate with the Nevada university, and losing interest in a contest with a supposedly interior foe.

But the L. D. S. boys hope to assuage

at least a portion of their grief, by achieving an overwhelming victory at the track meet to be held in about two

## CLEAN CITY WORK.

Clubs Being Organized in the Schools -In the Health Department.

City clubs, being organized in all the schools of the city, will soon be furnished with neat pins as emblems of their membership. The pins are expected to arrive this week and will be ready for distribution the first of next week when the schools reopen after the spring vacation.

The women of the Ladies' Literary club, who have the matter of organiza-

tion of the clubs in hand, met yester-day and committees were appointed to distribute the pins in the various schools. The badges will be given to schools. The badges will be given to pupils becoming members free of charge, but all other persons desiring to join the clubs will be charged the nominal sum of 5 cents for each one. The health department believes that dirty streets are just as dangerous to the health of the city as dirty yards, and it is the intention to keep them as free from filth as possible. It is thought that a system of street sweeping, similar to that in use in other large cities, should be adopted here. The system is, to have a force of men to do nothing but to look after the streets and keep The health department believes that

the streets should be more thoroughly sprinkled and the dust kept down. Dust is a carrier of germs and, if allowed to be blown over the city, it cannot help but deposit them where disease will be created. The residence districts, as well as the business ones, should be well as the business ones, should be well sprinkled, and, it is thought the best results are not obtained by sprinkling at night.
